- ✓ Mobile Platform Application.
- ✓ 08/2022: Charity activities.

FUTURE GOALS

- EFinance is one of the best contract codes available today.
- It has two main features which are auto burning of locked liquidity and auto farming mechanism, but the main difference is that the team will use their portion of transaction tax to donate directly to those who need it.
- Focused on giving back automatic profits to the less fortunate, EFinance aims to use blockchain technology to help charities and communities that are often underserved.
- Holders have the opportunity to increase quantity and price.

PLAN

FEATURE

- 5% tax on transactions.
- Every single transaction has a 2% burn, and a 3% lock in contract.

LIQUIDITY

- All LP tokens have been LOCKED for 1 year
Contracts are announced.
- No owner.

AUTO-BURN

- Every single transaction has a 2% burn.
- This contributes to less volatility and the contract price keeps rising.

CHARITY TOKEN

- EFinance have been stored away into our charity wallet. All of this allocation is going to be donated.
- If necessary, please suggest the organization.
